The Lab

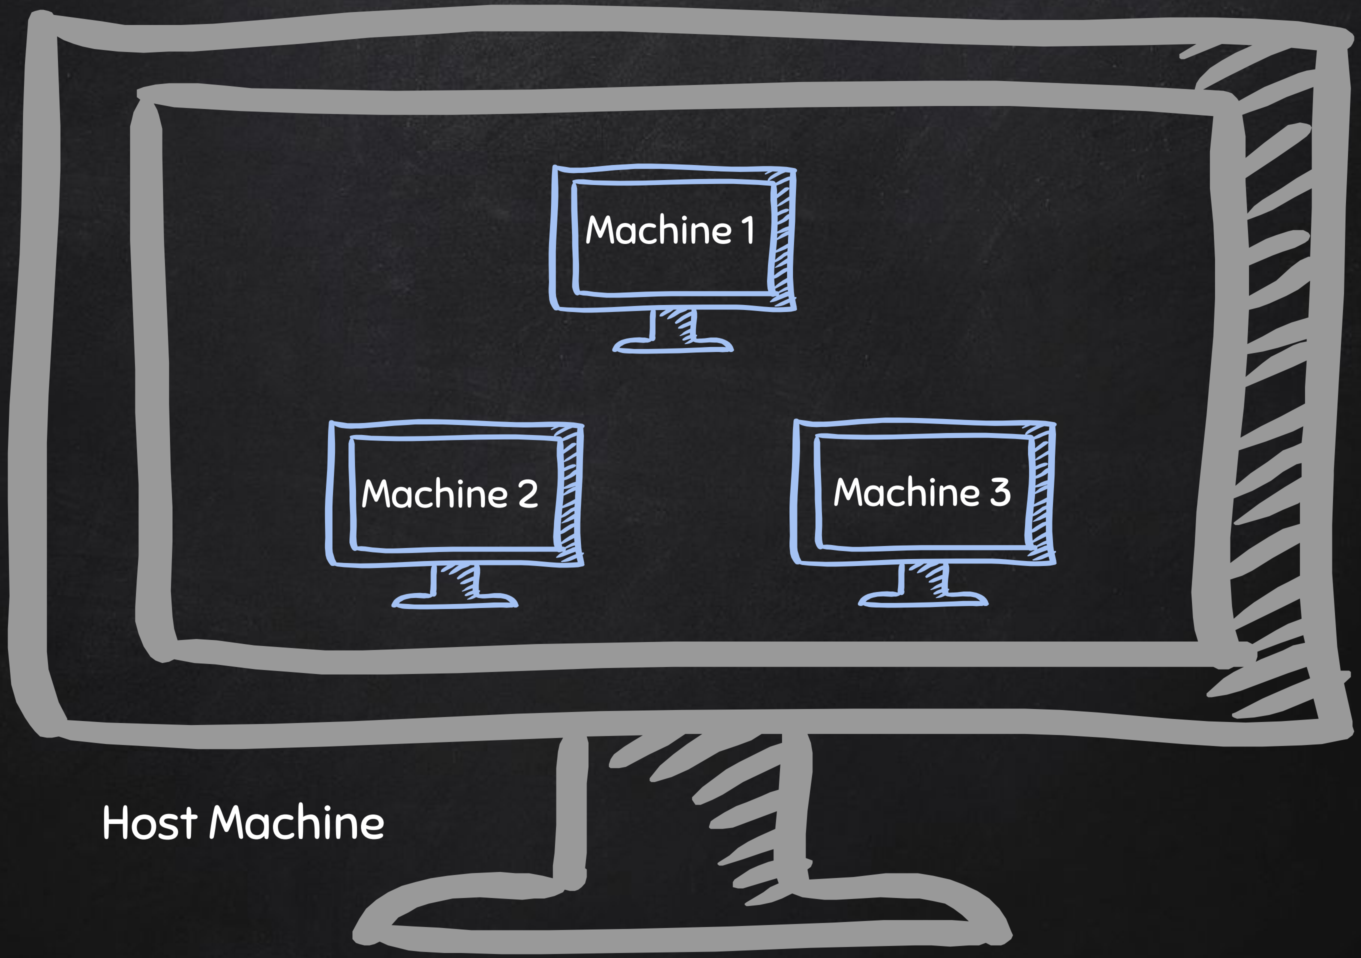

- A place to experiment and practice hacking.
  - Hacking machine.
  - Other machines to hack.
  - Websites to hack.
  - Networks
  - .....etc

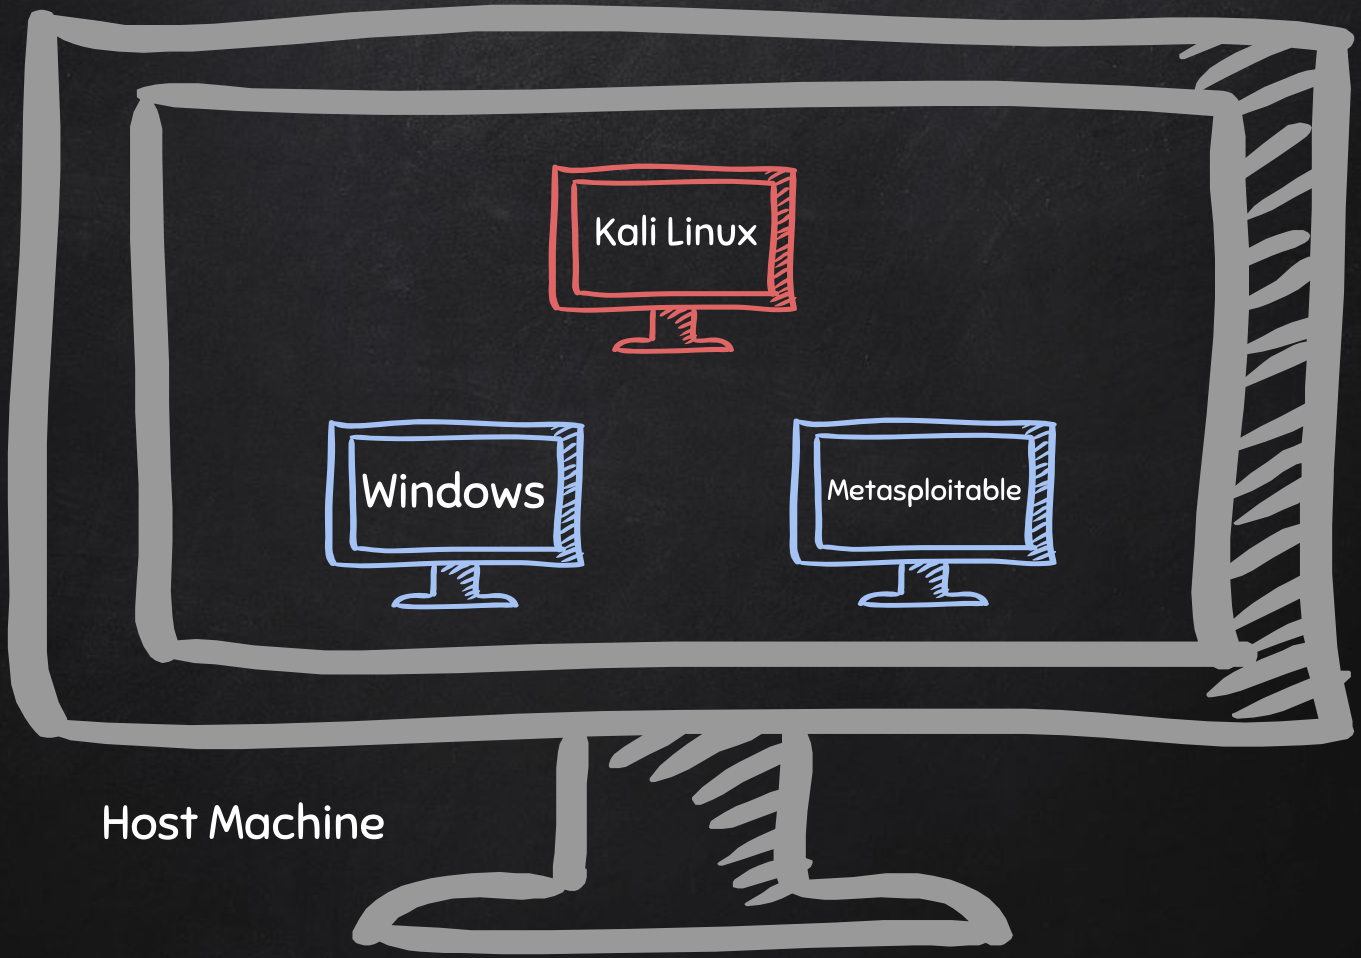

The Lab

Windows / OS X / Linux
Host Machine

Machine 1
Machine 2
Machine 3
Host Machine

Kali Linux
Windows
Metasploitable
Host Machine

The Lab

virtualization

- Install a number of operating systems inside your current OS.
- Each machine has its own resources and functions like a real machine.
    - Makes testing easier.
    - Easier to fix.
    - Isolated from the host os.
